## OUR MPG Team's KEY SERVICES

### AS-BUILT DRAWINGS/ DIGITIZATION USING RASTER DESIGN & AUTOCAD:

- We offer lump sum as well as Cost-plus quotes for these ASBUILT DRAWINGS for various Industries. Clients reduce all their paper work by converting all manual drawings available in scanned format to INTELLIGENT drawings.

### DATA ENTRY:

- Capturing and processing data from various input sources, such as scanned images, fax, forms, and e-mails etc. The electronic output is turned around back to client in electronic format.

### FORMS PROCESSING:

- Indexing service to capture highly important information from structured or unstructured forms. Processing can be done for: Medical claims, Invoices, Vital records, survey forms, Tax returns/reports, Credit files, Mortgage forms, Legal forms etc.,

### GIS RELATED SERVICES:

- **Digital Maps:** Creation of digital map data with Satellite Imagery or Aerial Photographs as source information.
- **Data Capture / Data Conversion:** Data Conversion for AM / FM and GIS. Graphic and attribute data are captured from legacy sources / CAD files and linked suitably.
- **GIS Implementation:** GIS solutions for a wide range of applications, starting with Data Conversion from legacy sources.
- **Integration with Enterprise Database:** GIS database creation and integration with Enterprise Database for better asset management and Enterprise-wide decision support.

### LOT GRADE DRAWING SERVICES:

- We offer a completely digitized LOT GRADE DRAWING in AutoCAD from client's basic input in the form of SURVEY. In addition we convert OLD scanned Survey inputs available with clients into intelligent digitized AutoCAD drawings.
